About This Game

A malevolent force known only as Lina is devouring data from a vast, interdimensional network of servers overseen by sentient computers called "motes." In desperation, the motes summon heroes from a variety of parallel game worlds to face off against each other in one-on-one combat. The tournament victor has the potential to be awakened as the Blade Stranger—the savior who can vanquish Lina and protect the motes from further harm!

Developed by Studio Saizensen, Blade Strangers is a hardcore old-school fighting game. The streamlined four-button control scheme makes it easy for beginners to deal out damage from day one...but the intricate combos, counters and specials give tournament-caliber players plenty of opportunities for frame counting, chain construction and hit-box science.

- Fighter roster includes characters from previous Studio Saizensen games (like Code of Princess and Sayonara Umihara Kawase), Nicalis games (like Cave Story+) and other surprise entrants
- Each character has eight different color settings and their own familiar "home" stage
- Proprietary development system transforms 3-D models and animation into 2-D spritework; every frame looks like a gorgeous anime drawing
- Online competition play
- Accessible controls designed to bring fresh blood to the ranks of fighting-game fans worldwide

I wanted to like this (mostly because it had Shovel Knight and Isaac) but it's not very fun to play and doesn't have enough characters. Also it seemed to stutter even on an overpowered machine, and I couldn't get v-sync to work.. It's a fun game with very simplified inputs that has charming characters with fun to execute moves and a deeper combat system than most people seem to think.

I wish it was more popular, as it stands it really flew under the radar in a way it definitely didn't deserve.. Note:picked this up for \$20 during sale.

I have to say this is the most refreshing fighting I have played in a while. After hearing that the game speed was slow and the controls were simplified, I wasn't sure I would enjoy this game. I bought it anyway and I'm glad I didn't listen to the haters. First off the walk may feel slow but I think it has more to do with size of the screen not the walk speed. There is actually a youtube video which compares this games walk speed to other fighting games and many cases blade strangers is faster(link below). And of course There is dashing which feels very fast and the fighting itself is very fast and fluid. The simplified controls make this game perfect for any beginner to fight game without sacrificing the depth I'd want out of one. My girlfriend prefers this to more traditional fighting game inputs as well. To us, this control scheme just feels right and allows us to pull 2 digit combos on eachother with relative ease. We haven't had this much fun since killer instinct. I love the visuals and the huge character sprites. The only thing I would suggest is this game releases season passes with more characters. Nicalis has a pretty large stable of characters and it would great to see more franchises represented in this title.

Walk speed video:

<https://youtu.be/nEJ6exPsDCs>. While quality wise it may not stick with your King of Fighters or Street Fighter or even Blazblue however, this game has a system built on it's own. Very simple maybe due to the characters that most of cast. come on like who would want a highly complex Issac or Shovel Knight? Anyways, This game is a solid 7/10 it's well produced fighting game that has basic offense and defense that sorta reminds a bit of Rumble Fish 2 and Chaos Code. The music is great as well.
